Master Package
(BJS2) created by Wes Bos

profile

I have a passion for creating beautiful web applications where I can express my creativity and potential. Coding for me is more than the knowledge, I do this for a living and love what I do as every day there is something new and exciting to learn. It gives me the opportunity to help others, share and grow together as one community.

skills

HTML5	jQuery	GitHub	VScode
CSS3	Firebase	Responsive Web Design	
Sass	React	Web Accessibility	
Javascript	Git	Working with API's	

projects

KOMBUCHA LAB
REACT | FIREBASE

Created an e-commerce app with a variety of kombucha drinks. This app allows user to select products of choice and add them to the cart. For this project, I used the React library in conjunction with the Firebase database.

TRAVELASK
JQUERY | DARKSKY/REST COUNTRIES API

JQuery application built remotely through paired programming. This app allows user to choose a country from the dropdown menu and get the most important information about your travel destination (weather, currency, language, capital) at the click of a button.

VSCODE SHORTCUT PRO
JQUERY | SASS

Built an interactive game that helps user to learn shortcut commands in VScode editor. The app was created with jQuery & Sass.

experience

SENIOR NAIL AESTHETICIAN:

- RITUAL HAIR SKIN BEAUTY | SEP 2019 - MAR 2020
- MAJESTY'S PLEASURE | JUL 2016 - JUL 2019

I was delivering high-quality service to customers. Assisted in promoting the spa's retail offerings by recommending a variety of care products. Maintained client relationships through exceptional customer service. Training and mentoring junior aestheticians by helping to learn new techniques, trends. Effectively handled the workload by serving 10-14 customers daily.

CALL CENTER OPERATOR:

UNICALL CENTRAL AND EASTERN EUROPE | AUG 2015 - JAN 2016

The main responsibility was to ensure the highest standards of customer care. Managed and updated customer databases with the status of each customer. Met personal/team qualitative and quantitative targets. Also, managed large amounts of inbound and outbound calls. Fluency in multiple languages helped me to collaborate with others and contribute more to product development.
